TECHNICAL PROJECTS
[https://github.com/bluespirit777]

Project 1: Active Directory Home Lab —
I created an Active Directory home lab, incorporating Splunk, Kali Linux, and Atomic Red Team.

Project 2: Cisco Home Network —
I designed and configured a home network using Cisco Packet Tracer, with a Cisco 2911 router, a Cisco 2960 switch.

Project 3: Wireshark Security Analysis —
I used Wireshark for network traffic analysis by capturing and analyzing both encrypted and unencrypted traffic.

Project 4: SQL ticketing system —
I developed a customer support ticketing system using SQL to manage and track support tickets.

Project 5: SIEM Home Lab —
I developed a custom dashboard in elastic SIEM to visualize security events and analyzed security events.

EDUCATION

Western Governors University -
Cybersecurity and Information Assurance

In Progress
